Fair Research Handbook

4th Edition

Kumamoto University

Foreword

This handbook is intended to clarify the basic rules of fair research activities for anyone performing research at Kumamoto University.

Due to stories of research fraud in the news recently, the university established the Fair Research Promotion Committee under the direct control of the President, the chief administrative officer of the university to discuss and implement methods for preventing research fraud.

This handbook was developed to help researchers understand and fully cooperate with rules of research misconduct. We endeavor to maintain society's high confidence in science and the research activities conducted at this university.

Fair Research Promotion Committee

Research Misconduct

Α	Fabrication, manipulation, and plagiarism resulting from neglecting the fundamental duties associated with being a researcher.		
В	Destruction, concealment, and dissipation of research materials that are necessary to confirm the existence of the activities stated in A (including materials necessary for the reproduction of experiments and the like during the examination of the charges of misconduct).		
С	Improper behavior other than that in A and B that deviates from accepted research ethics as defined in the university's Code of Conduct or conventional wisdom that researchers should abide by.		
D	Misappropriation of research funds for purposes other than those defined in the content of the grant application or that violate its conditions either intentionally or through gross negligence.		

Code of Conduct

Code of Conduct for Research in Kumamoto University

As a comprehensive university, and in the spirit of the "The Fundamental Law of Education" and the "School Education Law", Kumamoto University's purpose is to create, develop, foster, and pass on knowledge. The university strives to develop human resources with high intellectual, ethical, and practical abilities who contribute to both regional and international societies.

The university endeavors to strengthen core competencies in advanced academic research, promote leading-edge creative research, and develop a rich cultural heritage. In addition, the university has a responsibility to comprehensively expand the various sciences related to humanity, society, and nature; to promote academic research of those sciences; and to contribute to the coexistence of humans and nature through sustainable development of society by taking advantage of the features of a fully comprehensive university.

The members of the university (including officers, teaching staff, students, professors emeriti, honorary doctors, guest professors, etc.) must understand the purposes described above, and always perform their duties with ethical judgment and behavior. Therefore, the university established the Code of Conduct to be followed by all members.

I. Researcher Responsibilities

- 1. Researchers (i.e., staff engaged in any research activity in the university) must always act honestly and sincerely; use good faith judgment; endeavor to improve their own specialized knowledge, capability, and artistry; and make their best effort to demonstrate the scientific accuracy and validity of knowledge created by their research.
- 2. Researchers must be aware of the fact that the autonomy of science is accepted by the trust and mandate of society; understand the relationship between science, technology, society, and nature from a wide perspective; and act appropriately.
- 3. Researchers must be aware of the broad expectation of society when using research funds (including all funds used for research in the university, such as R&D Capital that are subsidized through screening for proposed themes publicly sought for by funding agencies, operating expense subsidies, contribution to scholarships, research grants, and revenue from the university hospital) provided to maintain the research environment and perform research.
- 4. Researchers should aggressively disclose and explain the significance and role of their own research; evaluate its potential influences on humanity, society, and nature; and demonstrate the results in a neutral and objective manner.
- 5. Researchers must select the appropriate means and manner as accepted by society in which their research and its results should be made public.
- 6. Researchers must participate in training sessions on research ethics, laws and regulations related to research activities, prevention of research misconduct, and endeavor to promote fair research activities.

II. Fair Research

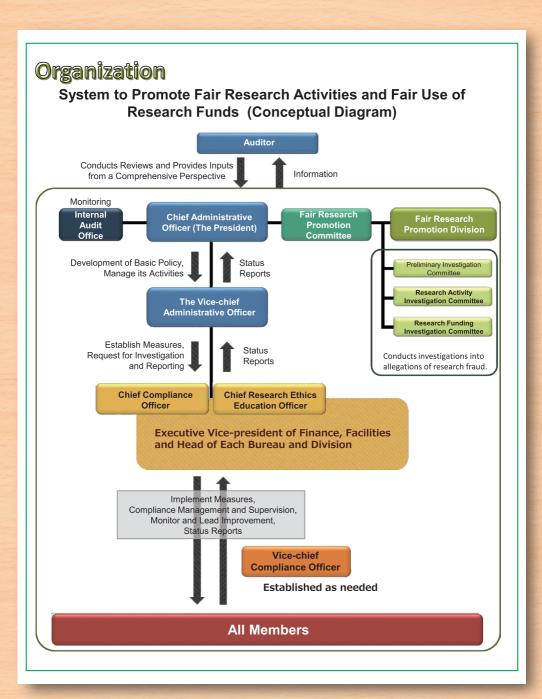

- 7. Researchers shall act sincerely in accordance with the Code of Conduct in the process of framing, planning, performing, applying, and reporting their own research. Researchers must take responsibility for recognition of their achievements to suit their roles by demonstrating the results of their research through academic publications or other means. Researchers must record and store complete data of their investigations; strictly treat the data according to the rules; prevent research misconduct, such as fabrication, manipulation, plagiarism, and misappropriation of research funds; and themselves not participate in such misconduct.
- 8. Researchers must be aware of the fact that performing responsible research, and establishing and maintaining a fair environment to prevent research misconduct are important duties to be performed their own. They must endeavor to obtain the understanding and cooperation of society to qualitatively improve the research environment of the scientific community and the organization to which they belong.

III. Appropriate Operation and Management of Domestic Research Funds

- 9. Researchers must thoroughly recognize that even if their research fund proposal is accepted, the university is responsible for the management of the funds because they are financed primarily by domestic taxes. Any misappropriation of research funding has a serious impact on the whole of the university and all scientists engaged in research activities.
- 10. University employees must operate and manage research funds appropriately. They must thoroughly understand and comply with the rules defined by each research fund classification and the related regulations of the university.
- 11. University employees must adhere to the rules regarding research funds and continuously participate in compliance education to prevent misappropriation of funds.

IV. Compliance with Laws and Regulations

- 12. University employees must comply with related laws and regulations when performing research activities and using research funds.
- 13. When considering publication of research, university employees must consider any conflicts of interest between individuals and organizations, or between different organizations, and deal with conflicts openly and appropriately.

Prohibited Matters

Forbidden!!

Infractions can become a criminal matter. Please consult the help desk (on page 19) if you are not sure!

Research Funding Fraud

- ·Vendor Deposits
- Fake Business Trips
- ·Fake Remunerations
- Overstatement of Expenses

et cetera.

Vendor Deposit

Where an employee requests a vendor to prepare fake documents on transactions with the university, applies for research funds based on the fake documents, and then deposits the overpayment with the vendor as a secret savings.

Fake Business Trip

Where an employee receives reimbursement of travel expenses by submitting fake business trip reports even though he/she cancelled the trip.

Research Fraud

- Fabrication
- Manipulation
- Plagiarism
- ·Inappropriate Authorship
- ·Abandonment of Researcher Duties

et cetera.

Inappropriate Authorship

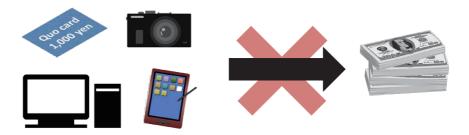

Where a staff member does not disclose the authors of a paper appropriately. Examples include crediting a person who did not contribute to a paper, or refusing to credit a person who has made a significant contribution.

Prohibited Matters

Absolutely Unacceptable!!

Infractions can become a criminal matter. Please consult the help desk (on page 19) if you are not sure!

Conversion to Money

The university shall perform physical inspections by random sampling for the following goods:

High Value Goods

- PC
- Tablet Computer
- Digital Camera
- Video Camera
- TV
- Recording Equipment
- Cash Voucher
- Precious Metal for Experiments et cetera.

Penalties

If an employee is involved in research misconduct, he/she will be punished in accordance with the laws and regulations established by the university. Additionally, the following actions (I - IV) will be taken if necessary.

- **Banning the use of research funds** inside and outside of the university for a limited time,
- Demand the return of all or part of the research funds that have been used,
- III. <u>Criminal suit and civil suit</u> against the staff member who performed research misconduct, and
- IV. <u>Penalty for the head of the bureau or division</u> where the staff member who performed the research misconduct belongs to if the head is responsible for managing members in the prevention of misconduct.

In some cases, a penalty may also be imposed on the research institution (the university) in addition to the individual by the funding body.

- Return research funds used inside and outside of the university over a determined period of time,
- II. Adverse assessment of indirect expenses for the research institution (the university), and
- III. <u>Suspension of commissioned projects</u> for the university.

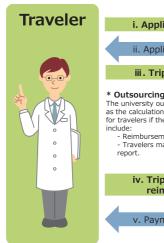

[Help Desk] - Administered in each department by the person in charge of travel expenses

I. Travel Expense Payments

Notes for researchers:

- Evidence of business travel by a trip report that includes proof-of-travel documents, such as the proceedings of an academic conference, is required.
- Evidence of incurred expenses by documents, such as receipts, is required.

Travel Expense Reimbursement Flow Chart

i. Application for travel (using system)

ii. Application approval (using system)

iii. Trip arrangement and travel

* Outsourcing of travel expenses administration

The university outsources a part of travel expense administration such as the calculation of travel expenses and reimbursement. The merits for travelers if they request trip arrangement by an outsourcing agency

- Reimbursement for transport expenses, etc. will be unnecessary - Travelers may omit some evidence documents attached to a trip
 - iv. Trip report and travel expense reimbursement request (using system)

v. Payment

Administration

Examples of Evidence Documents

Classification	Transportation	Evidence Documents
Railroad, Bus		N/A(Receipts are necessary if traveler used limited express.)
Domestic trip	Ship	N/A(Receipts are necessary if traveler used a sleeper cabin.)
Airline		Receipt, Boarding pass, etc.
Railroad		Documents attesting to the class and amount
	Ship	Documents attesting to the class and amount
Oversea trip	Airline	Receipts and documents attesting to the course and passenger class (estimates are acceptable), and boarding passes for domestic travel
Car rentals		Proof of payment documents, receipts

^{*}For some research funds, documents other than those listed above may be necessary. If you have any questions, please contact the help desk.

[Help Desk]

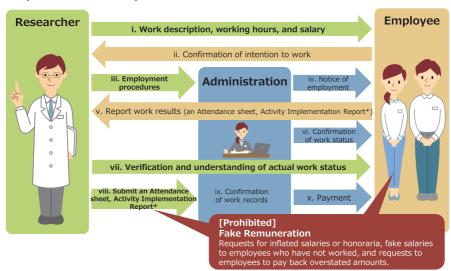

- Administered in each department by the person in charge of human resources

II. Salary Payments

Notes for researchers:

- i. Explain the type of work, working hours, and salaries to prospective employees
- i. Confirm intention to work with prospective employees
- iii. Confirm and provide proof of actual working conditions to prospective employees

Payment of Salary Flow Chart

* Employment procedure

In principle, completion of <u>employment procedures</u> are necessary at least one month before employment if a researcher requires an employee.

However, one-time remuneration is sufficient in some cases (e.g., <u>employment under two months or other forms of temporary work</u>). Please contact the help desk before hiring an employee for details.

* If employees are hired using R&D Capitals (e.g., KAKENHI)

If an employee's salary is paid using R&D Capitals, the employee must work full-time on the research that the R&D Capital targets. The employee may not engage in work/research other than that based on the "Implementation Guidelines for Self-motivated Research Activities by Young Researchers Employed with Competitive Research Funds" (February 12, 2020, Agreement of the Liaison Meeting of Related Offices and Ministries on Competitive Research Funds).

* Activity Implementation Report

If remuneration for research collaboration is paid for employment of less than two months duration, the employee is required to submit an Activity Implementation Report, together with their attendance sheet, on the final working day of the month in which their research collaboration activity is conducted.

■. Materials/Goods Purchases

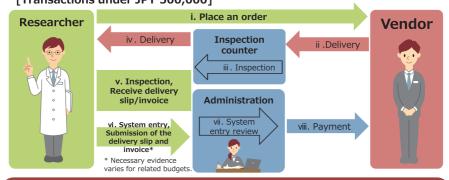

[Help Desk]

 Administered in each department by the person in charge of contracts, or by the accounting section of the hospital

Notes for researchers:

- i. Goods purchases should assure fairness, transparency, and economical competitiveness.
- ii. Requests for purchases over JPY 500,000 are made using the electronic ordering system (self purchases are prohibited).
- iii. Purchases over JPY 100,000 require pre-approval.
- v. Incoming purchases must be inspected by a certification counter or certified person.

Materials/Goods Purchases Flow Chart [Transactions under JPY 500,000]

ohibited

Vendor Deposit

A researcher conspires with a vendor to disguise purchase transactions to induce the university to pay, and he/she pools the money with the vendor as a secret savings account.

Fabrication of evidence

A researcher conspires with a vendor to prepare fake evidence such as quotations, delivery slips, and invoices to induce the university to pay for nonexistent goods.

Conversion into money

Break up of transaction

A researcher sells unused goods for conversion into money.

A researcher breaks up an order of closely related goods into multiple transactions to reduce the size of each transaction to under JPY 500,000 (including VAT) with a vendor.

[Transactions over JPY 500,000]

[Help Desk]
- Administered by each department's accountant

IV. Funding Rules for Research Expenses

Fund use rules may differ depending on the funding source.

Research funds, such as Grants-in-Aid for Scientific Research (KAKENHI), are R&D Capitals issued to the primary investigator(s) of a research program.

Research funds are to be managed by research institutes based on the rules of the funder and the research institute. It should be noted that research funding rules may differ depending on the funding source.

Please follow the appropriate use procedures after consulting with the department accountant.

 \bigcirc : Available \times : Not available \triangle : Available for some types of research funds

	Rules to be Followed	Representative Research Funds	Uses

V. Carry-over of Research Funds

[Help Desk]
Research/Social-Academic Collaboration
Department
Research Advancement Division x3186

Research-Industry Collaboration
Advancement Division x3984

⇒ Fair Research Promotion Office x3146

x3254

Depending on the research fund, <u>LAdvancement Division</u> part of it may be carried into the next fiscal year.

Some funds, such as KAKENHI, may be carried over into the next fiscal year.

If research cannot be completed within the planned fiscal year due to unforeseen circumstances, do not spend funding needlessly. Please consider a carrying the leftover funds into the next fiscal year to use in research expenses.

Follow your research plan for the use of research funding.

[Help Desk]

Research Fraud Prevention

Travel Application Requests

⇒ Labor Department

VI. Prevention of Research Funding Fraud

- For travel expenses:
 - · A pre-travel application is required
 - Submit a business trip report as soon as you return!
 ⇒Evidence of conducted business:
 - · Conference Ticket Stub · Academic resume · Conference nameplate
 - Participant business cards
 Photos
 Copy of notes

[Prohibited] Fake Business Trips

Expenses that differ from travel documents, expenses that differ from actual expenses incurred Please submit proper travel documentation to help prevent fake business trips.

 Please review the Kumamoto University faculty handbook and the fair research homepage.

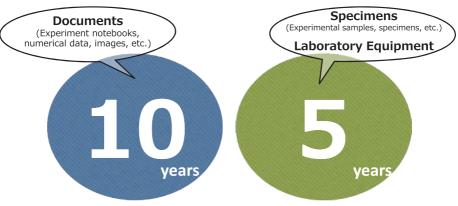

The faculty handbook on the university portal and the "Promoting fair research activities at Kumamoto University" website provide detailed information on compliance. Please contact the help desk if there is something you do not understand.

Rules for Research Activities

[Help Desk]
- Fair Research Promotion Office

x3146

Storage/Retention Periods for Research Materials (in Principle)

- * Regardless of the rules above, the officer responsible for research ethics education (department head) can establish special rules depending on the research activities of the department.
- * The storage period begins from the publication of the first paper.

Researcher Responsibilities

Researchers must comply with the Kumamoto University Research Code of Conduct, not engage in research fraud, and strive to prevent research fraud by others.

(Specifics)

- Attend training on laws and regulations related to research activities and ethics.
- Maintain means of research reproducibility so it can be verified by a third party.
 - Record research activities (experiments, observations, etc.) in experiment notes.
 - Log sufficient information (experimental conditions, data acquisition, etc.) in
 experiment notes for future use or verification, and in a format that can not be
 subsequent modified. Properly and securely store experiment notes as primary
 research information records.
 - Preserve research materials that were the basis for publication of results appropriately so they can support future use and/or verification.
 - Maintain searchable metadata for traceability of research materials for future reference.
- Properly store and manage research materials for the appropriate period of time.
- Appropriately disclose research materials and documents as necessary and if warranted.

Rules for Research Activities

\sim Before presenting research results \sim

- Have you followed the code of ethics of the research institution to which you belong and the article submission regulations?
- Are the images and tables exactly as described in the paper? Have you confirmed that preliminary data and data used to test your hypothesis not mixed together?
- Have you properly stored and managed experimental data, materials, samples, and notes?
- Are the experiments described in your paper reproducible by other researchers?
- Can you confirm the each coauthor's contribution? Do the coauthors agree with their joint responsibility for the content of the paper?
- Have you included citations for content or concepts from works that have already been published to avoid duplicate submission or plagiarism?

To prevent unintentional research fraud, such as bribery or plagiarism, to foster research ethics awareness, and to teach young researchers and graduate students early on how to write a correct dissertation, the university uses plagiarism detection software.

⇒ To use the software, apply at the Fair Research Office

Search:

熊大公正 (Kumamoto University Fair Research

I would like to purchase equipment for my research but the price is JPY 500,000 including value-added tax (VAT). Can I order it from a vendor directly?

If an item is over ¥500,000, you CANNOT order it yourself even if you have sufficient research budget. Please make a request to the contract management office through your department for items that are over JPY 500,000 including VAT.

I have a chance to publish a book using the academic publishing expense subsidy and I need to make a contract with the publisher. Can I use the signature of the head of my department after obtaining his/her approval?

You CANNOT use the signature of a department head because he/she does not have the authority to enter into a contract.

Please make a request to the contract management office through your department to obtain a valid signature.

We applied for a research/education project solicitation from MEXT which was accepted. If approved by the head of the department, can the researcher in charge receive funds into his/her personal bank account?

The researcher in charge CANNOT receive funds into in his/her personal bank account even if he/she obtains approval from the department head.

Project funds are (i) related to the operation of the university, (ii) managed by a researcher within the scope of his/her duties, and (iii) compensated by the university in the case of unexpected events, accidents, etc.

Funds are to be received by the university in a bank account managed by a treasurer.

I have surplus research funds at the end of the fiscal year. Can I purchase equipment for research planned for the next fiscal year?

No, you CANNOT make purchases for next year from this year's budget.

Most public research funds use a single-year national accounting system. As the Japanese fiscal year is from April to March, public research funds are, in principle, intended to be used systematically in this period. Therefore, you cannot receive equipment for use in the following fiscal year until after March 31. However, some research funds and surpluses resulting from specific circumstances may allow you to return or carry over the surplus.

If there is no budget remaining for the current fiscal year (March of each year), can I purchase materials myself in advance and be reimbursed the following year?

No, you CANNOT purchase materials in advance.

Without a budget, you cannot order materials for deliver in the following fiscal year. If the following year's budget is already set, you can make a purchase using that year's budget by setting the delivery date for on or after April 1. If you urgently need materials in March, you can try applying for a diversion of funds from within your department.

Improving Research Ethics Awareness

Research Ethics Education Courses

Kumamoto University has established "Guidelines for Research Ethics Education" and uses e-learning courses for every department.

Target Audience

- ①Persons with researcher numbers (e-Rad) at this university.
- 2 Persons who are included in applications for R&D capital and those who participate in research (including collaborators belonging to this university).
 - X It is recommended that persons outside of this university who have not participated in research ethics education at their own institution take the eL-CoRE or eAPRIN courses at this university.
- ③ Graduate students (master's, doctoral, and professional degree programs)
- * As a general rule, administrative staff (including administrative assistants) should take the eL-CoRE course.

Submission of a Written Oath

University staff must understand and comply with the following matters, and strive to appropriately manage research expenses, enforce rules, and pledge to not engage in research misconduct.

- 1. Kumamoto University Code of Conduct for Research
- 2. Kumamoto University Rules for Preventing Research Misconduct
- 3. If violations of the above items are discovered, bear the legal responsibility and comply with the punishment decided by the funding agency and Kumamoto University.
